TOPOLOGY SEMINAR

First constructions

By

Walker Stern
(Bilkent University)

Abstract: We explain how slice quasi-categories are defined, and how they provide a new notion of mapping spaces in a quasi-category. Using this new notion, we give an alternate characterization of equivalences of quasi-categories, and define initial and terminal objects in a quasi- category.

Part II of a sequence on Higher Categories (HC).

Date: Monday, February 26, 2024
Time: 13:30
Place: SA141 - Mathematics Seminar Room & ZOOM
