

ODTU-Bilkent Algebraic Geometry

“K3 covers of Enriques surfaces”

BY

ALİ SİNAN SERTÖZ

Abstract: I last talked on this subject on 2001 when I talked about Keum's 1990 work on the problem. There has been some activity on the subject since then which I want to talk about. I will explain the problem and summarize what has been done so far and prepare the audience for the next two talks where the speakers will explain their most recent contributions to the subject.

Date: 12 October 2018, Friday

Time: 15:40 +

Place: Mathematics Seminar Room SA-141

Tea and cookie will be served before the talk. You are most cordially invited.
