## “The fundamental group of a rationally connected variety”

BY

**TURGAY AKYAR**  
(ODTU)

**Abstract:** In the minimal model program it is known that there exist many examples of rationally connected varieties, such as smooth Fano varieties. In this talk I will present a paper by Janos Kollar, mainly concerned with the étale fundamental groups of separably rationally connected varieties.

**Date:** 11 May 2018, Friday

**Time:** 15:40 +

**Place:** Mathematics Seminar Room SA-141

Tea and cookie will be served before the talk. You are most cordially invited.
